Senior Software Engineer with 4.5+ years of experience developing scalable web applications using Angular, React, Next.js, Node.js, and TypeScript. Proven ability to build secure, high-performance, and production-ready applications across healthcare, networking, and SaaS domains.

Skills

Programming Languages: JavaScript, TypeScript, Python, Java

Frontend: Angular (v12 16), React, Next.js, Angular Material, Bootstrap, NGXS, Tailwind, HTML, CSS

Backend: Node.js, Express.js

Databases: MySQL, (Firebase Firestore, Realtime Database)

Cloud & DevOps: AWS EC2, S3 , Docker, CI/CD, GitHub Actions, Bitbucket

Architecture & APIs: REST APIs, Microservices, WebSockets, SSR, Distributed Systems

Authentication & Security: Keycloak SSO, OAuth 2.0, RBAC, Session Management, FingerprintJS

Testing & Methodologies: Unit Testing, Integration Testing, Postman, Agile, Scrum, Code Reviews, Git Flow

Education

Oriental University

Bachelor of Technology (B.Tech)

• **CGPA:** 8.31/10.00

Indore

Jul 2015 – Apr 2019

Experience

IDEAL IT TECHNO

Senior Software Engineer

Indore, India

Nov 2021 - Present

Ideal IT Techno is a software development company specializing in web and mobile application development, enterprise solutions, and cloud-based platforms for clients across multiple industries.

- Developed and maintained scalable full-stack web applications using Angular, React, Next.js, Node.js, and TypeScript for healthcare, networking, and SaaS domains.

- Designed and implemented secure authentication and authorization solutions using Keycloak SSO, OAuth 2.0, and RBAC across multiple enterprise applications.
- Built real-time features including chat, notifications, and live streaming using Socket.IO, Firebase, and HLS.js, supporting applications used by 10,000 users.
- Integrated and managed third-party services and cloud platforms, including AWS EC2, S3, Google Maps, HERE Maps, OneSignal, and FingerprintJS.
- Optimized application performance through lazy loading, code splitting, reusable components, and efficient state management, delivering production-ready applications on time.

PageUp Software Services Pvt. Ltd.

Indore, India

Software Engineer Trainee

Aug 2021 – Oct 2021

PageUp is an IT services company focused on developing web applications and enterprise software solutions for diverse business domains.

- Developed reusable and responsive UI components using Angular, HTML, CSS, and Bootstrap, improving development efficiency and code consistency.
- Collaborated with senior developers to implement new features, fix bugs, and integrate REST APIs while following coding standards and best practices.
- Participated in Agile development activities, including requirement discussions, code reviews, testing, and debugging, gaining hands-on experience in enterprise web application development.

Projects

Sohaara

Indore, India

<https://sohaara.com>

Professional networking and upskilling platform enabling users to learn, connect, find opportunities, and grow their careers or businesses through a unified ecosystem.

- Developed scalable and responsive web applications using Angular 16, TypeScript, Angular Material, and Bootstrap for a platform serving 10,000 users.
- Built reusable components, dynamic forms, and state management solutions using NGXS to improve application maintainability and development efficiency.
- Implemented secure authentication and authorization using Keycloak SSO, OAuth 2.0, and RBAC across multiple application modules.
- Developed real-time chat, push notifications, and live streaming features using Socket.IO, Firebase, and HLS.js to enhance user engagement.
- Integrated REST APIs and third-party services, including HERE Maps and OneSignal, while optimizing application performance through lazy loading and code splitting.

MyShyft

Indore, India

<https://myshyft.org>

Healthcare staffing marketplace that enables healthcare facilities and professionals to connect, manage shifts, and fill staffing gaps in real time.

- Developed a healthcare staffing marketplace using Angular and Firebase to connect healthcare facilities with medical professionals in real time.
- Built shift scheduling and workforce management modules using Full Calendar to streamline staffing operations and reduce manual coordination.
- Implemented real-time notifications and updates using Firebase to improve communication between healthcare facilities and professionals.
- Integrated Google Maps APIs to enable location-based facility discovery and navigation for healthcare workers.
- Developed responsive dashboards and role-based workflows for healthcare staff and administrators, improving operational efficiency and user experience.

LivelyConnect

Indore, India

<https://admin.livelyconnect.com>

Enterprise admin dashboard for platform management, user administration, reporting, and operational workflows.

- Developed and maintained Post Management modules, enabling content creation, moderation, approval workflows, and engagement tracking.
- Built Reels Management features for uploading, processing, categorizing, and monitoring short-form video content and user interactions.
- Implemented Claim Listing modules to manage claim requests, status tracking, verification workflows, and administrative actions.
- Developed User Management modules with role-based access control RBAC, user lifecycle management, and account monitoring capabilities.
- Designed Reporting and Analytics dashboards with filtering, sorting, pagination, and data visualization to provide operational and business insights.
