PROFESSIONAL SUMMARY

Software Engineer with 4.5+ years of experience building scalable web applications using Angular, TypeScript, React, and Next.js. Experienced in authentication systems (Keycloak SSO), real-time communication (Socket.IO), cloud integrations (AWS/Firebase), and enterprise dashboard development. Delivered networking, healthcare, and SaaS platforms serving thousands of users.

WORK EXPERIENCE

Software Engineer

November 2021 – Present

Ideal IT Techno

Indore - Onsite

- Developed Sohaara, a professional networking platform using Angular 16, reducing page load times by 30% and supporting 10,000+ registered users.
- Developed a centralized **Admin Management System** using NGXS and Ng Zorro. Created scalable dashboards for user management, content moderation, and platform operations.
- Implemented Keycloak SSO and RBAC across 4+ applications, reducing authentication maintenance effort and improving security compliance.
- Engineered **real-time chat, live streaming, and notification modules** using Socket.IO, HLS.js, and Firebase
- Integrated third-party services including Google Maps, HERE Maps, OneSignal, AWS SDK, and FingerprintJS.

Angular Developer Intern

Aug 2020 – Oct 2020

PageUp Soft Pvt. Ltd.

Indore - Onsite

- Worked as a trainee Angular developer, gaining hands-on experience in Angular 12, HTML, CSS, and Bootstrap.
- Assisted in building frontend UI components and learned industry-level development practices
- Contributed to internal web application development under senior developer supervision

TECHNICAL SKILLS

Frontend :	Angular, React, Next js, JavaScript, TypeScript, Angular Material, Bootstrap, NGXS,
Backend :	Node.js, Express.js
Databases & Caching:	MySQL, Firebase
Cloud & DevOps:	AWS (EC2, S3), Docker, CI/CD pipelines, Git (GitHub, Bitbucket)
System Design :	Microservices, distributed systems, REST, WebSockets
Testing:	Unit testing, integration testing, API testing (Postman)
Methodology:	Agile, Scrum, code reviews

PROJECTS

Sohaara | [Website](#)

Jan 2024 – Jun 2026

Professional Networking & Upskilling Platform

Tech: Angular 16, Angular Material, Bootstrap 5, Keycloak, Socket.IO, HERE Maps, OneSignal

- Built a professional networking and upskilling platform with jobs, gigs, learning, and entrepreneur-focused modules.
- Implemented Keycloak-based SSO, RBAC authorization, and secure session management across the platform.

MyShyft | [Website](#)

Apr 2023 – Dec 2024

Healthcare Staffing Marketplace

Tech: Angular 12, Firebase, FullCalendar, Google Maps, Bootstrap 4

- Developed a healthcare staffing platform connecting medical professionals with healthcare facilities.
- Built shift scheduling, calendar management, and location-based facility discovery features.
- Implemented Firebase-powered notifications, authentication, and compliance tracking dashboards.

LivelyConnect Admin Dashboard | [Website](#)

Jan 2022 – Mar 2023

Built an enterprise admin dashboard for platform management and reporting.

Tech: Next.js 14, React 18, Redux Toolkit, TanStack Table, Radix UI

- Built a modern SSR admin dashboard for platform operations, reporting, and content management.
- Developed advanced data tables with filtering, pagination, sorting, and reusable UI components.

EDUCATION

Bachelor of Technology | 2015 – 2019 | Oriental University Indore | CGPA: 8.31
